INTRODUCTION TO HTML

HTML Basics Fundamentals of HTML

Build Your Own Webpage Now that you know HTML, you can create your very own webpage. Let's get started!

HTML STRUCTURE: USING LISTS

HTML Basics II

Now that you know how to build a webpage, let's learn how to make it look a little nicer. You can add lists, change fonts, and more!

Social Networking Profile

create your own basic social networking profile! Let's get

HTML STRUCTURE: TABLES, DIVS, AND SPANS

HTML Basics III

Paragraphs and lists are great, but sometimes you want to lay your webpage out in a more complex way. Enter tables, divs, and spans!

Clickable Photo Page

Have you ever wanted to make a photo album or collection of images like the ones you've seen on Facebook or Pinterest? All it takes is a table.

INTRODUCTION TO CSS

CSS: An Overview CSS (Cascading Style Sheets) are what give your HTML pages their beautiful appearance. You've got the HTML structure down pat—now it's time to make your website look great!

Design a Button for Your Website Now that you know some CSS, you can style greatlooking buttons for your webpages.

CSS CLASSES AND IDS

CSS Selectors

You've learned a bit about CSS—now it's time to dive into the details of selectors, including multiple selectors, universal selectors, and class and ID selectors.

Sorting Your Friends

You've probably got a lot of friends on social networking sites, but they're not all your friends: you've probably got acquaintances, family members, coworkers, classmates, and so on. Let's sort them with CSS!

CSS ELEMENT POSITIONING

CSS Positioning

Now that you know exactly how to style any HTML element you want, it's time to learn how to place them exactly where you want them to appear on the page.

Build a Resume

Ready to (wait for it)... reposition yourself?
